I . Executive Summary

Main Points in the Results for FY2014/3

[Year-on-year comparison] Both revenue and profit increased as a result of the contribution of the Company's real estate leasing, the mutual direct train service with the Tokyo Metro Fukutoshin Line in railway operations, etc. Net income increased due to gains on the change in shareholders' equity, gains on the sale of fixed assets, etc.

[Comparison with the Nov. Forecast] Profit increased as a result of the last-minute purchase of commuter tickets ahead of a consumption tax hike, strong sales at Tokyu Store Chain, etc. despite lower revenue due to a decline in real estate sales. Net income grew owing to higher non-operating income, etc.

Main Points in Forecasts for FY2015/3

[Year-on-year comparison] Operating Profit will rise due to reduced expenses for the Company's railway operations, the strong results of real estate leasing, etc. Net income will decline as a result of a fall in extraordinary gains such as the gain on change in equity.

[Comparison with plan] Operating Profit of 70 billion yen was earned as initially planned. Net income increased, partly owing to a decrease in interest expenses.
