I . Executive Summary

Main Points in the Results for 1H of FY2015/3

[Year-on-year comparison] Despite lower revenue in the real estate sales business (primarily condominium sales), operating profit increased largely because of the strong performance of Tokyu Hotels and Tokyu Store Chain. Net income also fell, largely because of the decline in gains on the sales of fixed assets.

[Comparison with the May Forecast] Operating profit increased largely because of the strong performance of Tokyu Store Chain. However, revenue fell due to the reactionary fall to last-minute purchase ahead of a consumption tax hike in railway operations. Net income increased, reflecting a rise in investment gains from equity method.

(Comparison with Forecasts as of May)

Main Points in Forecasts for FY2015/3

[Year-on-year comparison] Operating profit is expected to increase, primarily due to falling expenses in railway operations and the strong performance of the real estate leasing business. Net income is likely to fall because of declines in gains on the changes in shareholders' equity and gains on the sales of fixed assets in extraordinary gains.

[Comparison with the May Forecast] Operating revenue, operating profit, and net income are expected to remain consistent with the forecasts made in May, mainly reflecting the strong performance of Tokyu Store Chain. This will help offset the slow recovery of the Tokyu Department Store chain due to the effects of the consumption tax hike and the larger-than-expected fall in railway operations in response to last-minute purchase.
